# IMED 2018

## **SUMMARY:**

Emerging infectious diseases are, more than ever, at the center of the world's attention. Join a diverse group of colleagues as they present new knowledge and breakthroughs about how to discover, detect, understand, prevent and respond to outbreaks of emerging threats.

## **ABSTRACT SUBMISSION:**

Deadline: July 1st, 2018

## **TARGET AUDIENCE:**

Healthcare professionals including physicians, and veterinarians, public health specialists, epidemiologists, research scientists, environmentalists, biotechnology industry, journalists, and policy makers.

## **TOPICS:**

- Emerging Infectious Diseases in Humans and Animals and the “One Health” Concept
- Methods and Models of Disease Surveillance, Detection, and Prediction
- Lessons from the Zika Epidemic
- Emerging Zoonoses and Animal Health Threats
- Biosecurity and Agents of Bioterrorism and Biological Warfare
- Infections Related to Travel and Migration of Humans and Animals
- Advanced Diagnostic Technologies for Emerging Infectious Diseases
- Foodborne and Waterborne Pathogens
- Specific Disease Threats: Nipah Virus; Pandemic, Avian, and Swine Influenza; Ebola, Yellow Fever, Lassa, and other Viral Hemorrhagic Fevers; MERS Coronavirus; Rift Valley Fever; Antimicrobial-Resistant Pathogens; Anthrax; Cholera; Healthcare Associated Infections, and Others
- Vaccines and Therapeutics for Emerging Diseases
- Planetary Health, Social, Political and Economic Factors in Disease Emergence
- Epidemic Preparedness and Response
- Neglected Emerging Threats: Snake Bites, Marine Toxins, and Fungal Pathogens
- Submitted Abstracts (Oral and Poster)
